
DISCLAIMER

- **We Are Not Financial Advisors or a Broker/Dealer:** Neither ScottPulciniTrader.com nor any of its officers, employees, representatives, agents, or independent contractors are, in such capacities, licensed financial advisors, registered investment advisers, or registered broker-dealers. ScottPulciniTrader.com does not provide investment or financial advice or make investment recommendations, nor is it in the business of transacting trades, nor does it direct client commodity accounts or give commodity trading advice tailored to any particular client's situation. Nothing contained in this communication constitutes a solicitation, recommendation, promotion, endorsement, or offer by ScottPulciniTrader.com of any particular security, transaction, or investment.
- **Securities Used as Examples:** The security used in this example is used for illustrative purposes only. ScottPulciniTrader.com is not recommending that you buy or sell this security. Past performance shown in examples may not be indicative of future performance.
- **Return on Investment "ROI" Examples:** The security used in this example is for illustrative purposes only. The calculation used to determine the return on investment "ROI" does not include the number of trades, commissions, or any other factors used to determine ROI. The ROI calculation measures the profitability of investment and, as such, there are alternate methods to calculate/express it. All information provided are for educational purposes only and does not imply, express, or guarantee future returns. Past performance shown in examples may not be indicative of future performance.
- **Investing Risk:** Trading securities can involve high risk and the loss of any funds invested. Investment information provided may not be appropriate for all investors and is provided without respect to individual investor financial sophistication, financial situation, investing time horizon, or risk tolerance. This Material may not be reproduced or distributed, in whole or in part, without prior written permission of ScottPulciniTrader.com. Any other reproduction or distribution, in whatever form and by whatever media, is expressly prohibited without the prior written consent of ScottPulciniTrader.com

Risk Disclosure

This site is for educational purposes only. Past results are not indicative of future returns.

Risk Disclosure: Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

Hypothetical Performance Disclosure

Hypothetical performance results have many inherent limitations, some of which are described below. no representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

DUMB AND DUMBER (D&D)

Bookmap.com SI Indicator setup #1

Dumb and Dumber is a setup where we are playing against the retail trader which I refer to as dumb money or uninformed money. The premise for the setup is when there is a significant stop run (above our product threshold), the majority of the time it is retail traders puking (uninformed money) and no real buying or selling behind it (large players) and we can fade that move with confidence. What we look for are stop runs where the market is immediately above or below the stop run area to trade in the other direction. The trade is taken when we see a stop run and when we see the corresponding opposite color bubble (aggressive market orders) and we place the stop above or below where the buy or sell stop initiated.
